Ph.D. Kensuke Takenouchi

'Evacuation switch' is a program to think about when to evacuate before a disaster.

We'll learn about the risks of floods and what to do during such an event.

It is precisely when an earthquake occurs that we should act calmly.

It's quite important for all of us to know about disaster prevention.

【Date】

Sunday 22th
October
13:00—15:30

【Venue】

I-PAL Kagawa
3rd floor
Main conference room
